

Luca Lischetti

a.k.a. sirlisko

Senior Software Engineer

Skills

Main

- JavaScript
- TypeScript
- Node.js
- Full Stack Architecture
- React
- React Native
- Expo
- Next.js
- HTML/CSS
- Accessibility (WCAG)
- CI/CD
- Testing (TDD / BDD / E2E)

Misc.

- GraphQL
- Redux
- Tailwind
- AWS
- GitHub Actions
- Astro
- Chrome Extensions
- Bash Scripting

Experiences

Red Badger

02/25 - Now

Developed a complete React Native app using Expo.

Focused on enhancing accessibility (WCAG 2.1 AA), improved the developer experience and expanded the test stack.

Integrated various systems using GraphQL and Auth0.

YLD

05/21 - 10/24

Developed a Next.js application, orchestrated and maintained a RESTful service for seamless data integration from various sources.

Standardised and modernised codebase, enhanced accessibility, and strengthened test coverage.

Built pipelines with GitHub Actions and deployed to Azure for seamless CI/CD.

Hackney Council

Multiple Gigs (11/19 ~ 05/21)

Developed new services utilizing React/Next.js, lambda functions deployed on AWS.

Contributed to internal Component Libraries, mentored junior developers, and shared knowledge.

Revamped the Hackney website using Jamstack (Gatsby, WordPress, Netlify), emphasizing React best practices and implementing robust testing strategies. Improved CI/CD.

USwitch / RVU

01/20 - 03/20

Enhanced internal tools using React/Redux-Saga to manage complex async data flows and API integrations.

Contributed to the internal UI/component library, improving consistency across products.

Architecture Consultant

09/19 - 11/19

Initiated a Next.js (TypeScript) project with Apollo (FE/BE) and GraphQL Gateway, integrating REST APIs (internal and third-party) alongside WordPress data.

Kalo

04/19 - 06/19

Architected a monorepo and shared UI library, driving performance improvements and developer experience.

Reason

09/18 - 12/18

Built a new service from scratch for a client utilizing React/Redux and Node.js for API proxy.

Previous Experiences:

Shazam (~5 years), YOOX Net-a-Porter (1+ years), Pobble (1+ years), Verve (1+ years). Full details on LinkedIn.

Once upon a time...

I've also worked with Python, Java, Scala, PHP, MySQL, C++, and Ruby on Rails – years of curiosity and exploring different parts of the stack.

Freelancing

- Delivered commercial websites and bespoke solutions using WordPress, Gatsby, and Astro.
- Integrated headless CMS platforms including Sanity.io and others for content management.
- Built custom serverless features using Netlify Functions and AWS Lambda.

Side Projects

GigPlaylist

Next.js app that proxies several APIs (Spotify, MusicBrainz, Songkick, etc.), combines their data to predict the most probable songs for a given artist's gig, and creates a Spotify playlist for you using Spotify Auth.

GifDay

Webapp that assigns a GIF to every day of the year using the Giphy API, built with React, Supabase, and Edge Functions.

To see a full list of my side projects and npm packages go to sirlisko.com/projects.

Education

Degree in Computer Science @ Università degli studi dell'Insubria & Universidad de Salamanca.

Thesis on Assistive Technology - <https://assistivetechology.it>

Extras

Co-held a workshop on TDD in Javascript @ Università di Cesena.

Volunteer & collaborator at Front-End Conference - [From The Front](#).

Project Lead / Volunteer Cook at [FoodCycle](#) – helping reduce food waste and support local communities.

Cisco CCNA certificate (Cisco Certified Network Associate).

Trained as Fire Marshal.

Interests

Music, cinema, books, pizza, modern art, 8-bit graphics, travel, and TTRPG – currently running campaigns as Game Master.
